

Tennessee Child Count Data (618)

Table 1-Section A reflects the number of infants and toddlers, ages birth through age 2 (children who have not reached their third birthday) who are receiving early intervention services under Individual with Disabilities Education Act (IDEA), have an Individualized Family Service Plan (IFSP) in place on December 1. Data are collected for each individual age and for each racial/ethnic category. A cross-tabulation of individual age by race/ethnicity is not collected.

Definitions of Race/Ethnicity Categories:

- American Indian or Alaskan Native: A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.
- Asian or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. The Pacific Islands include Hawaii, Guam, and Samoa.
- Black or African American (not Hispanic): A person having origins in any the black racial groups of Africa.
- Hispanic or Latino: A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
- White (not Hispanic): A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
- Total: The unduplicated total across the race/ethnicity designations.¹

Table 2-Report of Program Settings where early intervention services are provided to infants, toddlers with disabilities and their families in accordance with Part C. Data are collected for seven program settings; the categories and their definitions are presented in Table 2.1 below. Each infant or toddler who receives early intervention services is reported only once on the Child Count form. Although infants and toddlers often receive services in several program settings, this data collection only collects information on the primary setting, that is, the program setting in which the infant or toddler receives the most hours of early intervention service. ²

Table 2.1

Program Setting	Definition
1. Program Designed for Children with Developmental Delay or Disabilities	This setting refers to an organized program of at least 1 hour in duration provided on a regular basis. The program is usually directed toward the facilitation of one or more developmental areas. Examples include early intervention classrooms/centers and developmental child care programs.
2. Program Designed for Typically Developing Children	Services are provided in a program regularly attended by a group of children. Most of the children in this setting do not have disabilities. For example, this includes children served in regular nursery schools and child care centers.
3. Home	Services are provided in the principle residence of the child's family or caregivers.
4. Hospital (inpatient)	Hospital refers to a residential medical facility. Child must be receiving services on an inpatient basis.
5. Residential Facility	Residential facility refers to a treatment facility which is not primarily medical in nature, where the infant or toddler currently resides.
6. Service Provider Location	Provider location services are provided at an office, clinic, or hospital where the infant or toddler comes for short periods of time (e.g., 45 minutes) to receive services. These services may be delivered individually or to a small group of children.
7. Other Setting	Any service setting not included in the settings or programs listed above. For example, if the only component of the infant's early intervention services is parent counseling during which the child is not present, and the child receives no direct service, count as "other."

Table 3-Report on Infants and Toddlers Exiting Part C Programs. State counts of the number of infants and toddlers with disabilities, ages birth through age 2, who exited Part C services during a 12 month reporting period. Only infants and toddlers who had an active individualized family service plan (IFSP) in place at some time during the State determined 12 month reporting period. Data has been collected since 1998-99 reporting period. No changes have been made to this data collection. ³

Table 3.1

Program Completion	Definition
1. Completion of IFSP <i>prior to reaching maximum age</i> for Part C.	Include all children who have <i>not reached maximum age</i> for Part C, have completed their IFSP, and no longer require services under IDEA, Part C.
2. Eligible for IDEA, Part B.	Include all children served in Part C who exited Part C and were determined to be eligible for Part B during the reporting period. This includes children who receive Part B services in conjunction with Head Start.
3. Not eligible for Part B, exit with referrals to other programs.	Include all children <i>who reached maximum age</i> for Part C, were determined not eligible for Part B, and were referred to other programs, which may include preschool learning centers, Head Start (but not receiving Part B services), and child care centers, and/or were referred for other services, which may include health and nutrition services, such as WIC.
4. Not eligible for Part B, exit with no referrals.	Include all children who reached maximum age for Part C and were determined not eligible for Part B, but were not referred to other programs.
5. Part B eligibility not determined.	Include all children for whom Part B eligibility has not been made. This category includes children who were referred for Part B evaluation, but for whom the eligibility determination has not yet been made or reported and children for whom parents did not consent to transition planning. Include in this category any child <i>who reached maximum age</i> for Part C, and who has not been counted in categories 2 through 4 above.
Other Exit Reasons	Definition
6. Deceased	Include all children who died during the reporting period, even if their death occurred at the age of exit.
7. Moved out of State.	Include all children who moved out of State during the reporting period. Do not report a child who moved within State (i.e., from one program to another) if services are known to be continuing.
8. Withdrawal by parent (or guardian)	Include all children whose parents declined all services after an IFSP was in place, as well as children whose parents declined to consent to IFSP services and provided written or verbal indication of withdrawal from services.
9. Attempts to contact the parent and/or child were unsuccessful.	Include all children who have not reached the maximum age of service under Part C, who had an active IFSP, and for whom Part C personnel have been unable to contact or locate the family or child after repeated, documented attempts. Include in this category any child who did not complete an IFSP and exited Part C before reaching maximum age and who has not been counted in categories 6 through 8.

Table 4-Report of Early Intervention Services on IFSP. States counts the number of early intervention services provided to infants and toddlers with disabilities according to the individualized family service plan (IFSP) in place on December 1 of the reporting year. Data are collected as a two-way tabulation of service category by race/ethnicity. These data are not collected by individual age year. Infants and toddlers may be reported as receiving one or more services. This data collection captures only the services on the IFSP, not the number of times a particular service was received. Children and their families are counted under each type of service they are receiving.⁴

Early Intervention Services:

Assistive Technology Services

Audiology

Family Training, Counseling, and Home Visits

Medical Services

Health Services

Nursing Services

Nutrition Services

Occupational Therapy

Physical Therapy

Psychological Services

Social Work Services

Special Instruction

Speech Language Pathology

Transportation and related costs

Vision Services

Other Early Intervention Services

(for definitions of services see IDEA "97 Final Regulations CFR 303.12)

Table 5-Number and Type of Personnel employed and contracted to provide early intervention services to infants and toddlers with disabilities and their families. Data are collected in full-time equivalents (FTEs) and are reported by type of provided. Data were first collected in 1988-89 on a voluntary basis. Beginning with 1989-90 data collection, States were required to report personnel data. In addition to reporting the number of personnel employed, from 1987-88 through 1997-98 States also reported the number of additional personnel needed to provide early intervention services. These counts were to include unfilled vacancies and personnel needed to fill positions occupied by persons not appropriately trained for the position. This requirement was eliminated in the 1998-99 data collection. In 1989-90, two new personnel categories (paraprofessional and physicians) were added, and an additional three categories (family therapists, orientation and mobility specialists, and pediatricians) were added in 1992-93.⁵

Personnel are reported based on their professional qualifications, not by the early intervention service they are providing. Personnel who are serving administrative duties are not counted unless they are also providing early intervention services to infants and toddlers with disabilities. Only the portion of their time providing early intervention services is to be counted in FTE.⁶
